[Company]

PERSONALITY REPORT

Your Personality Report

The Inventor 💡

Quiet · Visionary · Logic · Flexible

Always asking “how does it work?”

WELCOME

Welcome to your report

You answered 24 statements about how you think, feel and live. This report puts your answers together: who you are, what you do best, what to watch for — and a 4-week brain-training plan made for the way your mind works.

Read it at your own pace. Every chapter is short. Share it with someone close to you if you like — many people find it fun to compare types.

Inside your report

1 Your type and how rare it is

2 Your 4 scales

3 Your strengths

4 Your blind spots

5 How you make decisions

6 Relationships: family, friends, children and grandchildren

7 You at your best

8 People, pastimes and questions

9 How your mind works

10 Your brain-training plan: 4 weeks, 10 minutes a day

11 How to start in the [Company] app

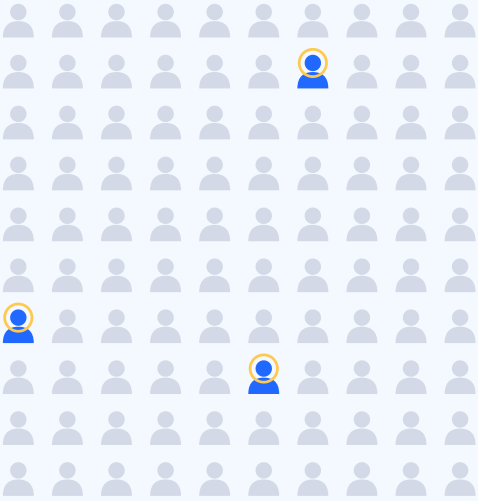

12 About this report

Your answers stay private. This report is for self-discovery and entertainment. It is not a medical or psychological diagnosis.

CHAPTER 1

You are The Inventor 💡

Always asking "how does it work?" You love ideas for their own sake and enjoy taking problems apart. You often find a clever solution nobody else saw.

3.3%

Only about 3 in 100 people share your type

Your type is one of 16. Each has its own strengths, blind spots and way of thinking — this report is about yours.

Your four sides

Quiet
Energy

Visionary
Mind

Logic
Decisions

Flexible
Lifestyle

You in three words

Original ideas · Logical analysis · Curiosity that never retires

At your best, you test ideas against the facts and change course without fuss.

Type frequency: estimates for U.S. adults from a national sample of 3,009 people (Myers et al., 1998). Our test uses its own 4 scales, so the figure is an estimate.

CHAPTER 2

Your 4 scales

Each scale has two sides. Nobody is 100% one side — your answers showed which side you lean toward. It is marked with ✓.

Energy — Where do you get your energy?

Social **✓ Quiet**

You recharge in quiet. A calm morning, a book or one good friend gives you energy back.

Mind — What do you notice first?

Visionary ✓ Grounded

You notice ideas, meanings and possibilities. You like to ask “what if?”

Decisions — How do you decide?

Logic ✓ Heart

You decide with your head. You weigh facts and fairness first.

Lifestyle — How do you like to live?

Planner **✓ Flexible**

You like open options and room to change course. You adapt easily.

CHAPTER 3

Your strengths

These are the things people value in you — often more than you realize.

💛 Original ideas

Your mind produces ideas no one else thought of.

⭐ Logical analysis

You can take any problem apart and see how it works.

🌿 Curiosity that never retires

You keep learning simply because things are interesting.

Your mind’s natural strengths

Based on how you take in information and how you like to live, your mind is naturally good at:

Big-picture thinking · Flexibility

Your brain-training plan builds on these strengths and trains the areas that get less practice.

CHAPTER 4

Your blind spots

Every strength has a flip side. Blind spots are not flaws — they are habits worth noticing.

🔍

Leaves many projects half-finished

New ideas pull you away before the old one is done.

> Try this: **Keep a “finish first” list with only three items on it.**

🌱

Forgets everyday details while deep in thought

Deep in thought, you can forget the appointment or the pot on the stove.

> Try this: **Use one alarm or one note in the same place every day.**

What slips first for your type

For The Inventor, what tends to slip first is **everyday details and unfinished tasks**. Your brain-training plan in Chapter 10 starts exactly there.

CHAPTER 5

How you make decisions

Logic Flexible

You weigh the facts but keep your options open until the last moment. You are good at changing course when new information appears. Watch for: putting off a choice that is already clear.

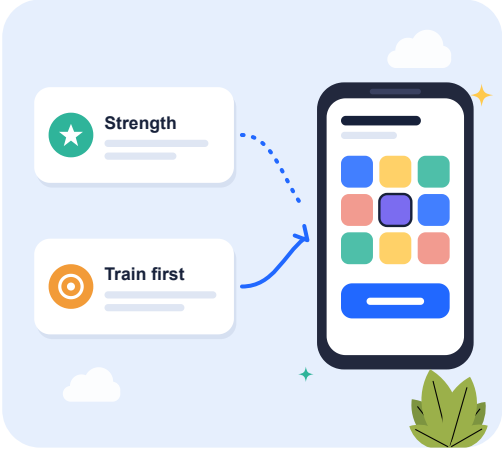

At your best, you test ideas against the facts and change course without fuss.

Three small habits for better decisions

1. Set yourself a “decide by” day for choices that keep waiting.
2. Write the two best options on paper — seeing them helps you commit.
3. Tell people when you have decided, so they are not left guessing.

Why this matters for your mind

Deciding uses your working memory: holding several options in mind and comparing them. The Logic and Math games in your [Company] plan practice exactly that — in a few relaxed minutes a day.

CHAPTER 6

Relationships and communication

You are calm, honest and say what you mean in few words. People trust your advice. Others may read your quiet as distance, so a small kind word goes a long way.

With your family

You show love through reliability: you fix, help and keep your word. Saying the warm part out loud now and then means a lot to your family.

With friends

You have a few friends you trust completely. You prefer a real conversation to small talk, and people value your honest advice.

With children and grandchildren

Your children and grandchildren learn from you by watching: how to build, fix or think something through. One-on-one time suits you best.

> **Friends love your curiosity; a quick “how are you?” keeps them close.**

Staying sharp for the people you love

Remembering names, following a fast family conversation, keeping up with your children’s and grandchildren’s news — these are the everyday moments your brain-training plan is built around.

CHAPTER 7

You at your best

Everyone has good days and hard days. Knowing your pattern helps you get back to your best faster.

☀️

At your best

Curious and inventive. You find the clever fix nobody else saw.

🌧️

Under stress

You may get lost in your head, put things off and forget to reply to people.

🌿

What brings you back

A puzzle, a book or a project with no deadline — then one small task finished.

How to talk to you

Share this with the people close to you.

1. Give you time to think before you answer.
2. Use facts, not pressure.
3. Respect your quiet time — it is not a sign of distance.

CHAPTER 8

People, pastimes and questions

You may share your type with

Albert Einstein
physicist, theory of relativity

Marie Curie
scientist, two Nobel Prizes

Bill Gates
founder of Microsoft

Based on public descriptions of these people, not official assessments.

Pastimes you may enjoy

- Writing, journaling or a memoir
- Reading and history
- Puzzles and strategy games
- Learning a language

Three questions for this week

1. Which idea am I ready to finish?
2. What decision have I been putting off?
3. Who would enjoy hearing my latest idea?

CHAPTER 9

How your mind works

Your mind jumps from idea to idea and spots hidden patterns. The flip side: attention drifts, and unfinished thoughts pile up.

Your strength is pattern-spotting. What slips first is attention: unfinished thoughts and everyday details pile up.

Small slips with names and details are common at any age. Short daily practice keeps your mind in the habit of noticing.

Your mind in four areas

These are the four areas you can train in the [Company] app. Here is the order that fits your type.

🧠	**Memorization**	holding names, numbers and details in mind	Week 1 · train first
🎯	**Focus**	staying with one task and noticing what changed	Week 2 · train next
🧩	**Logic**	seeing patterns and finding a new order of steps	Week 3 · new areas
➗	**Math**	quick mental math and holding several numbers at once	Week 3 · new areas

Personality describes habits of thinking, not your memory or health. Brain games are practice, not treatment. If you are worried about your memory, talk to your doctor.

CHAPTER 10

Your brain-training plan

4 weeks · 10 minutes a day · 2 games a day, about 5 minutes each. Each week focuses on one area of your mind, in the order that fits The Inventor.

WEEK 1 🧠 Memorization

Big-picture minds race ahead and let small details slip. Short memory games keep names, dates and lists close at hand.

Code

Remember a short code and repeat it back.

> **Why it's for you:** Short sequences, like a PIN or a phone number — precise and measurable.

Pair Tiles

Remember where the pairs of pictures are, then find them on a closed board.

> **Why it's for you:** It turns memory into a clear score: pairs found and accuracy.

This week helps you: Remember names and details without the awkward pause.
You'll know it's working when your Memorization number on the Progress tab is higher than on day 1, and you can recall the names of three new people you met this week.

WEEK 2 🎯 Focus

Flexible minds jump between ideas. Attention games help you stay with one task until it is done.

Memo

Memorize the positions of the cards, then find them all.

> **Why it's for you:** It trains you to notice where things are, not only what they mean.

Numbers

Find the numbers in order as fast as you can.

> **Why it's for you:** Keeps a wandering mind on one simple goal: the next number.

This week helps you: Keep track of your keys and glasses, and follow a conversation without losing the thread.
You'll know it's working when your Focus number on the Progress tab is higher than on day 1, and you finish a chapter, a recipe or a TV episode without starting over.

WEEK 3 🧩 Logic + ➗ Math

This week brings in the two areas you haven't trained yet. Play one game from each, every day.

Single Line — Logic: Fill the whole shape with one continuous line.

> **Why it's for you:** Short, visual puzzles that reward a fresh look rather than a fixed method.

Fast Math — Math: Solve quick sums before the time runs out.

> **Why it's for you:** Clear right-or-wrong answers and a score you can beat tomorrow.

This week helps you: Solve everyday problems and adjust calmly when plans or routines change. Think quickly — check a bill or count change in your head.

WEEK 4 All four together

New games from all four areas. Play 2 of these each day, changing the mix, and see which area grew the most since day 1.

Dots — Logic: Connect dots of the same color without crossing the lines.

Pair Tiles — Memorization: Remember where the pairs of pictures are, then find them on a closed board.

Cross Math — Math: Fill in the missing numbers so every line of the crossword adds up.

Numbers — Focus: Find the numbers in order as fast as you can.

Your 28-day check-in

Tick a circle each day you play. Aim for at least 5 days a week — that is how a habit forms.

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Week 1	○	○	○	○	○	○	○
Week 2	○	○	○	○	○	○	○
Week 3	○	○	○	○	○	○	○
Week 4	○	○	○	○	○	○	○

CHAPTER 11

How to start in the [Company] app

Your plan is ready. Three steps, about two minutes.

1 **Download [Company]**

Get [Company]

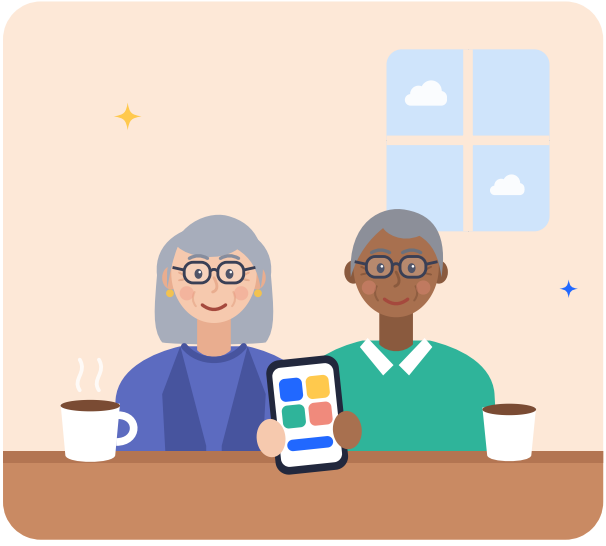

Tap to install [Company] from the App Store or Google Play.

2 **Sign in with your email**

Open the app and tap **“Already purchased on web? Sign in”** on the first screen. Enter the same email you used here and the code we send you. Your subscription is already active.

3 **Open your plan and play**

Go to the **Games** tab and start Week 1: **Code** and **Pair Tiles**. Check your numbers on the **Progress** tab once a week.

Make it a habit

Pick one moment you never skip — your morning coffee, after lunch, before the news. Play then, every day. 10 minutes is enough.

Your plan at a glance: Memorization → Focus → Logic + Math → all four.

CHAPTER 12

About this report

Entertainment, not diagnosis

This personality test is for self-discovery and entertainment. It is not a medical or psychological diagnosis and is not a substitute for professional evaluation.

How we built your type

You rated 24 statements, six for each of four scales: Energy, Mind, Decisions and Lifestyle. Each scale shows which side you lean toward. Your four sides together give one of 16 types. Our scales and type names are our own.

About the rarity figure

How common each type is comes from estimates for U.S. adults in a national sample of 3,009 people (Myers et al., 1998). Because our test uses its own scales, the figure is an estimate.

About brain games

[Company] games are everyday mental practice. They are not a medical treatment and do not diagnose, treat or prevent any condition. If you notice changes in your memory that worry you, please talk to your doctor.
