[Company]

PERSONALITY REPORT

Your Personality Report

The Problem-Solver 🔧

Quiet · Grounded · Logic · Flexible

Calm hands, practical mind.

WELCOME

Welcome to your report

You answered 24 statements about how you think, feel and live. This report puts your answers together: who you are, what you do best, what to watch for — and a 4-week brain-training plan made for the way your mind works.

Read it at your own pace. Every chapter is short. Share it with someone close to you if you like — many people find it fun to compare types.

Inside your report

1 Your type and how rare it is

2 Your 4 scales

3 Your strengths

4 Your blind spots

5 How you make decisions

6 Relationships: family, friends, children and grandchildren

7 You at your best

8 People, pastimes and questions

9 How your mind works

10 Your brain-training plan: 4 weeks, 10 minutes a day

11 How to start in the [Company] app

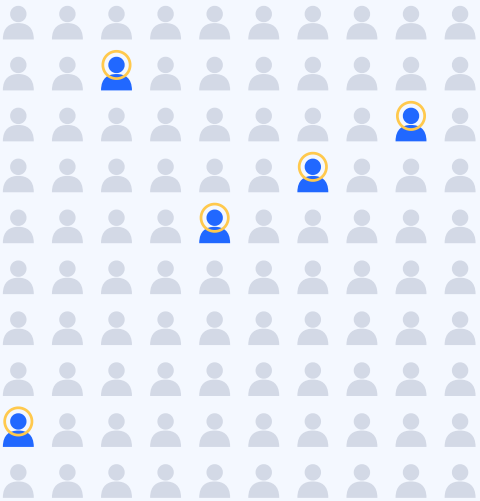

12 About this report

Your answers stay private. This report is for self-discovery and entertainment. It is not a medical or psychological diagnosis.

CHAPTER 1

You are The Problem-Solver 🔧

Calm hands, practical mind. You figure out how things work and fix them. You stay cool in a crisis and act when it counts.

5.4%

About 5 in 100 people share your type

Your type is one of 16. Each has its own strengths, blind spots and way of thinking — this report is about yours.

Your four sides

Quiet	**Grounded**	**Logic**	**Flexible**
Energy	Mind	Decisions	Lifestyle

You in three words

Hands-on skill · Staying calm · Practical logic

At your best, you decide on the spot with practical common sense.

Type frequency: estimates for U.S. adults from a national sample of 3,009 people (Myers et al., 1998). Our test uses its own 4 scales, so the figure is an estimate.

CHAPTER 2

Your 4 scales

Each scale has two sides. Nobody is 100% one side — your answers showed which side you lean toward. It is marked with ✓.

Energy — Where do you get your energy?

Social — **✓ Quiet**

You recharge in quiet. A calm morning, a book or one good friend gives you energy back.

Mind — What do you notice first?

Visionary — **✓ Grounded**

You trust facts, experience and practical details. You notice what others miss.

Decisions — How do you decide?

Logic ✓ — Heart

You decide with your head. You weigh facts and fairness first.

Lifestyle — How do you like to live?

Planner — **✓ Flexible**

You like open options and room to change course. You adapt easily.

CHAPTER 3

Your strengths

These are the things people value in you — often more than you realize.

Hands-on skill

You can fix almost anything.

Staying calm

You stay cool when things go wrong.

Practical logic

You find the practical answer.

Your mind’s natural strengths

Based on how you take in information and how you like to live, your mind is naturally good at:

Memory for details · Flexibility

Your brain-training plan builds on these strengths and trains the areas that get less practice.

CHAPTER 4

Your blind spots

Every strength has a flip side. Blind spots are not flaws — they are habits worth noticing.

🔍

Gets restless with long, slow tasks

Long, slow tasks make you restless.

> Try this: **Break long tasks into 10-minute pieces.**

🌱

Keeps people at arm’s length

You keep people at a distance.

> Try this: **Invite one friend to do something practical with you.**

What slips first for your type

For The Problem-Solver, what tends to slip first is **patience with slow tasks**. Your brain-training plan in Chapter 10 starts exactly there.

CHAPTER 5

How you make decisions

Logic Flexible

You weigh the facts but keep your options open until the last moment. You are good at changing course when new information appears. Watch for: putting off a choice that is already clear.

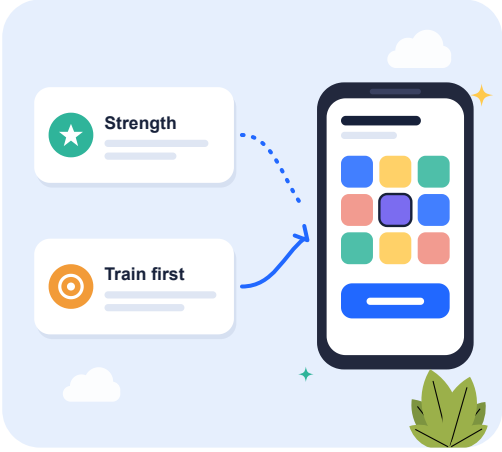

At your best, you decide on the spot with practical common sense.

Three small habits for better decisions

1. Set yourself a “decide by” day for choices that keep waiting.
2. Write the two best options on paper — seeing them helps you commit.
3. Tell people when you have decided, so they are not left guessing.

Why this matters for your mind

Deciding uses your working memory: holding several options in mind and comparing them. The Logic and Math games in your [Company] plan practice exactly that — in a few relaxed minutes a day.

CHAPTER 6

Relationships and communication

You are calm, honest and say what you mean in few words. People trust your advice. Others may read your quiet as distance, so a small kind word goes a long way.

With your family

You show love through reliability: you fix, help and keep your word. Saying the warm part out loud now and then means a lot to your family.

With friends

You have a few friends you trust completely. You prefer a real conversation to small talk, and people value your honest advice.

With children and grandchildren

Your children and grandchildren learn from you by watching: how to build, fix or think something through. One-on-one time suits you best.

> **You show care by doing; a few words of warmth go a long way.**

Staying sharp for the people you love

Remembering names, following a fast family conversation, keeping up with your children's and grandchildren's news — these are the everyday moments your brain-training plan is built around.

CHAPTER 7

You at your best

Everyone has good days and hard days. Knowing your pattern helps you get back to your best faster.

At your best

Calm, handy and practical. You fix what is broken, quickly and quietly.

Under stress

You may go silent, get blunt and want everyone to leave you alone.

What brings you back

Hands-on time: a repair, a drive, a hobby — on your own terms.

How to talk to you

Share this with the people close to you.

1. Give you time to think before you answer.
2. Use facts, not pressure.
3. Respect your quiet time — it is not a sign of distance.

CHAPTER 8

People, pastimes and questions

You may share your type with

Clint Eastwood
actor and film director

Amelia Earhart
aviation pioneer

Bear Grylls
adventurer and TV host

Based on public descriptions of these people, not official assessments.

Pastimes you may enjoy

- Gardening
- Crafts, woodwork or knitting
- Nature walks and birdwatching
- Photography

Three questions for this week

1. Which idea am I ready to finish?
2. What decision have I been putting off?
3. Who would enjoy hearing my latest idea?

CHAPTER 9

How your mind works

Your mind learns by doing and reacts fast. Training focus helps with the tasks that need patience, not just quick action.

Your strength is learning by doing and fast reactions. What slips first is patience with tasks that need sustained focus.

Small slips with names and details are common at any age. Short daily practice keeps your mind in the habit of noticing.

Your mind in four areas

These are the four areas you can train in the [Company] app. Here is the order that fits your type.

🧩 **Logic**	seeing patterns and finding a new order of steps	Week 1 · train first
🎯 **Focus**	staying with one task and noticing what changed	Week 2 · train next
🧠 **Memorization**	holding names, numbers and details in mind	Week 3 · new areas
➗ **Math**	quick mental math and holding several numbers at once	Week 3 · new areas

Personality describes habits of thinking, not your memory or health. Brain games are practice, not treatment. If you are worried about your memory, talk to your doctor.

CHAPTER 10

Your brain-training plan

4 weeks · 10 minutes a day · 2 games a day, about 5 minutes each. Each week focuses on one area of your mind, in the order that fits The Problem-Solver.

WEEK 1 🧩 Logic

Detail-minded people rely on proven routines. Logic puzzles train the mind to find new patterns when routines change.

Single Line — Fill the whole shape with one continuous line.

> **Why it's for you:** Short, visual puzzles that reward a fresh look rather than a fixed method.

Dots — Connect dots of the same color without crossing the lines.

> **Why it's for you:** Quick to start and you can try another path at once — made for a mind that likes to experiment.

This week helps you: Solve everyday problems and adjust calmly when plans or routines change.
You'll know it's working when your Logic number on the Progress tab is higher than on day 1, and when a plan changes, you find a plan B in a few minutes, without stress.

WEEK 2 🎯 Focus

Flexible minds jump between ideas. Attention games help you stay with one task until it is done.

Fruit Sort — Sort the fruits so each basket holds one kind.

> **Why it's for you:** A tidy, practical task — focus without pressure.

Missing items — Look at a set of items, then spot what has gone missing.

> **Why it's for you:** Your eye for detail is a strength here — this keeps it quick.

This week helps you: Keep track of your keys and glasses, and follow a conversation without losing the thread.
You'll know it's working when your Focus number on the Progress tab is higher than on day 1, and you finish a chapter, a recipe or a TV episode without starting over.

WEEK 3 🧠 Memorization + ➗ Math

This week brings in the two areas you haven't trained yet. Play one game from each, every day.

Code — Memorization: Remember a short code and repeat it back.

> **Why it's for you:** Short sequences, like a PIN or a phone number — precise and measurable.

Fast Math — Math: Solve quick sums before the time runs out.

> **Why it's for you:** Clear right-or-wrong answers and a score you can beat tomorrow.

This week helps you: Remember names and details without the awkward pause. Think quickly — check a bill or count change in your head.

WEEK 4 All four together

New games from all four areas. Play 2 of these each day, changing the mix, and see which area grew the most since day 1.

Dots	Logic: Connect dots of the same color without crossing the lines.
Pair Tiles	Memorization: Remember where the pairs of pictures are, then find them on a closed board.
Cross Math	Math: Fill in the missing numbers so every line of the crossword adds up.
Missing items	Focus: Look at a set of items, then spot what has gone missing.

Your 28-day check-in

Tick a circle each day you play. Aim for at least 5 days a week — that is how a habit forms.

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Week 1	○	○	○	○	○	○	○
Week 2	○	○	○	○	○	○	○
Week 3	○	○	○	○	○	○	○
Week 4	○	○	○	○	○	○	○

CHAPTER 11

How to start in the [Company] app

Your plan is ready. Three steps, about two minutes.

1 **Download [Company]**

Get [Company]

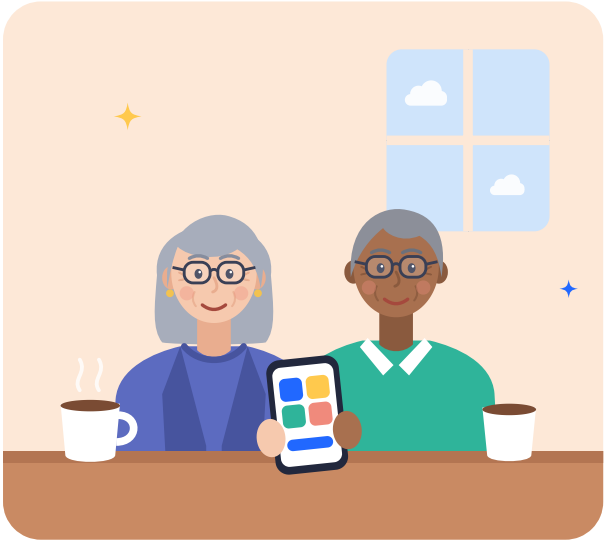

Tap to install [Company] from the App Store or Google Play.

2 **Sign in with your email**

Open the app and tap **“Already purchased on web? Sign in”** on the first screen. Enter the same email you used here and the code we send you. Your subscription is already active.

3 **Open your plan and play**

Go to the **Games** tab and start Week 1: **Single Line** and **Dots**. Check your numbers on the **Progress** tab once a week.

Make it a habit

Pick one moment you never skip — your morning coffee, after lunch, before the news. Play then, every day. 10 minutes is enough.

Your plan at a glance: Logic → Focus → Memorization + Math → all four.

CHAPTER 12

About this report

Entertainment, not diagnosis

This personality test is for self-discovery and entertainment. It is not a medical or psychological diagnosis and is not a substitute for professional evaluation.

How we built your type

You rated 24 statements, six for each of four scales: Energy, Mind, Decisions and Lifestyle. Each scale shows which side you lean toward. Your four sides together give one of 16 types. Our scales and type names are our own.

About the rarity figure

How common each type is comes from estimates for U.S. adults in a national sample of 3,009 people (Myers et al., 1998). Because our test uses its own scales, the figure is an estimate.

About brain games

[Company] games are everyday mental practice. They are not a medical treatment and do not diagnose, treat or prevent any condition. If you notice changes in your memory that worry you, please talk to your doctor.
